ANALOGUE AMMETERS AC

EQ74-I1822N1CAW0ST
Ammeter 72x72 0/40A Scale 0/40A (X2)

- Two panel sizes — 48x48mm and 72x72mm to suit different panel layouts and cutouts
- Direct and CT connect options — 48x48mm direct up to 10A, 72x72mm CT connect up to 40A
- Wide scale selection — 1A, 5A, 10A, 15A, 20A, 30A, and 40A ranges available
- Clear analogue indication — at-a-glance current reading without auxiliary power

PRODUCT DESCRIPTION

Sifam Tinsley AC analogue ammeters are available in 48x48mm and 72x72mm panel formats, covering current ranges from 1A to 40A. The 48x48mm models offer direct connection up to 10A, while the 72x72mm range provides CT-connected measurement across a broader selection of scales — making them suitable for switchgear, distribution boards, and motor control panels where clear, reliable current indication is required.
