DEHNGUARD TYPE 2 AND 3 SURGE ARRESTERS

PROJ952405
Dehnguard M Fm Surge Arrester

- Type 2 & Type 3 surge protection Ideal for protection against induced surges and switching overvoltages.
- Low protection levels Reduces stress on downstream equipment and extends service life.
- Fast response characteristics Effective protection for sensitive electronic and control systems.

PRODUCT DESCRIPTION

The **DEHNguard range** provides **Type 2 and Type 3 surge protection** for low-voltage electrical systems, safeguarding installations against **switching surges and transient overvoltages**.

Designed for installation within **sub-distribution boards and close to terminal equipment**, DEHNguard surge arresters help protect sensitive electrical and electronic devices while supporting long-term system reliability. They are widely used across **commercial, industrial and residential projects in Ireland** where dependable surge protection is required.
