ADVANTECH - MIC MODULAR PC SYSTEMS

Compact modular PCs that support i-module expansion

MIC-7300-S1A1E
Modular Compact Fanless PC, Intel Celeron N3350, iModule

- Compact Fanless System
- Intel® Celeron® N3350 to Intel® Xeon®
- iModule compatible
- GPU compatible for deep learning applications
- 9 ~ 36 V DC input power range

PRODUCT DESCRIPTION

The compact modular MIC series of computers support i-module expansion to satisfy diverse application requirements. The fanless design can be widely deployed for factory and machine automation. Reduced lead time for built to order systems due to the easy configuration system.
