BASLER COAXPRESS CXP-12 FRAME GRABBER CARDS

2200000701
Basler CXP-12 Interface Card 2-channel connection - frame grabber

- High speed CoaXPress 2.0 interface
- 1, 2, or 4 ports
- Latest FPGA technology
- Reduce system complexity and cost

Product description

Basler's CXP-12 interface cards allow single or multi-channel connection, with 1, 2, or 4 ports and are the perfect fit for Basler's Boost camera range, reducing implementation complexity and cost. Ideal for multi-camera system, requiring high bandwidth, low latency and long cables can also be purchased for industries and applications with different set ups. e.g., semiconductor and solar industry, display inspection (FPD), print inspection, food inspection and medical technology.

Specifications

Camera interface	CoaXPress 2.0
Connector	Micro-BNC/HD-BNC
Dimensions	167.64mm (L) x 111.15mm (H)
FPGA	Yes
Memory	1 GByte DDR4-RAM
Number Of Ports	2
Operating temperature	0°C ... +50°C
PC Bus Interface	PCIe 3.1 x8
Storage temperature	-50°C ... +80°C
