WIDE SLOT PANEL TRUNKING

T1100X125G
Panel Trunking 100x125G Wide Slot 2mt(B0

- Fire-safe low smoke emission
- Wide slot for easy wiring
- Complies with IEC/EN standards
- Durable & corrosion-resistant

IBOCO

PRODUCT DESCRIPTION

The Wide Slot Panel Trunking is a durable, halogen-free cable management solution designed for industrial and commercial electrical installations requiring flexible and accessible wiring. It ensures minimal toxic gas emission in the event of fire, providing enhanced safety in sensitive environments such as control panels, data centers, and public buildings.
Its wide slot design allows for easy cable insertion, routing, and maintenance, making it ideal for high-density wiring applications where quick access is essential. The robust construction offers excellent mechanical strength and protection while maintaining a clean and professional finish. This trunking meets rigorous safety and quality standards, delivering a reliable and efficient solution for organizing and safeguarding cables in demanding environments.
