LIQUIDTIGHT PVC/METAL FLEXIBLE CONDUIT (GREY) AND GLANDS

DMC235
Flexible Conduit Liquid Tight 34.5 * 43m

- Suitable for underground applications
- Strong mechanical resistance
- IP67 resistance with gland fitted
- Self extinguishing

PRODUCT DESCRIPTION

The Liquid Tight Flexible Conduit is a robust, flexible wiring solution designed to protect electrical cables in demanding environments. Constructed with a galvanized steel core and covered in a PVC jacket, it offers excellent resistance to moisture, oil, corrosion, and mechanical impact. Ideal for industrial, commercial, and outdoor applications, this conduit is commonly used in machinery, HVAC systems, and areas exposed to vibration or liquid ingress. It meets relevant standards for flame retardancy and ingress protection, ensuring long-lasting and secure cable protection.
