PVC/METAL FLEXIBLE CONDUIT AND GLANDS

DMA216N
Conduit Black Flexible 15.2x19.5mm

- High crush resistance and mechanical strength
- UV and flame-resistant PVC coating
- Flexible steel core for easy routing
- Full range of glands and accessories
- Wide temperature and size compatibility

PRODUCT DESCRIPTION

Demesne supplies a high-quality range of **PVC-coated and bare metal flexible conduits** along with compatible glands, designed to protect electrical cables in demanding environments. Whether you're routing cables in machinery, buildings, or outdoor installations, these conduits offer strong mechanical protection, high flexibility, and resistance to oil, weather, and chemicals.

Engineered in Italy by Euro 2000, our conduits are available in galvanized steel or stainless steel, with or without PVC coating, depending on the level of durability and environmental resistance you need. Matching fittings and glands ensure easy, secure installation with a professional finish.

SPECIFICATIONS

Bending Radius	50
