

CAMERA KITS FOR RIGID DUMP TRUCKS

REVERSING-RDT

Reversing camera system for rigid dump truck

- Analog PAL/NTSC
- Digital HD
- Reversing camera systems to full 360 degree view systems
- Active camera systems available

Product description

A rigid dumper truck can often have limited field of vision due to the design, field of vision is commonly reduced at the rear, entire right side and directly in front of the machine. Orlaco supply a range of camera kits and systems that combat this reduced visibility, from reversing systems to full reversing, sides and front view systems in analog and digital.
