

CAMERA KITS FOR MINING SHOVELS

REVERSING-SIDE-MS

Reversing-side view camera system for Hydraulic mining shovel

- Analog PAL/NTSC
- Digital HD
- Reversing-side view and surround 270 degree view
- For all types of mining shovel

Product description

Hydraulic mining shovels have limited field of vision to the entire right side, rear and immediate left due to the design and position of the bucket. Good visibility to the front of the vehicle is a necessity, using orlaco cameras enhances the visibility of the bucket.

Orlaco supply reversing-side view cameras and surround 270 degree view systems.
