## ESI - PR3800 - FLUSH DIAPHRAGM PRESSURE SENSOR

PR3820-0010BR 4-20mA, 0..10 bar, DIN11851 32mm female, DIN

- Thick film sensor technology for long service life
- Pressure ranges up to 400 bar
- Up to 250°C media temperature option
- Easy clean flush membrane to prevent clogging

## Product description

Robustly constructed from stainless steel, the PR3800 series incorporates the latest strain gauge technology together with a custom IC amplifier offering excellent stability and accuracy over a long service life. The range offers a stable and accurate output signal of 4-20 mA with options for 0-5 V and 0-10 V. Typical applications include food processing, pharmaceutical, petrochemical, waste water and slurry handling. In these installations the process media may corrode the sensing diaphragm or clog the narrow pressure inlet on a standard transmitter. The flush membrane can be easily cleaned for long term reliability and outstanding performance. For hygienic applications the PR3800 series provides a sanitary grade pressure fitting. Seals are available in a variety of forms and materials for a wide range of applications and can be directly attached to the proposed connection or remotely via stainless steel capillary. Pressure ranges available from 0-200 mbar to

An optional ATEX and IECEx approved versions of this range are available for explosion protection for flammable gases (zone 0), dusts (zone 20) and mining areas (group I M1).

## Specifications

Ambient temperature       -2085°C         Approvals       CE, IEC         Electrical connection       DIN A 43650         EMC       EN61000-6-4, EN61000-6-2         Linearity       ≤±0.3% BSFL         Materials Wetted Parts       Stainless steel         Media temperature       -2085°C         Output       4-20 mA         Overpressure protection       15 bar		
EMC EN61000-6-4, EN61000-6-2   Linearity ≤±0.3% BSFL   Materials Wetted Parts Stainless steel   Media temperature -2085°C   Output 4-20 mA   Overpressure protection 15 bar	Ambient temperature	-2085°C
EMC EN61000-6-4, EN61000-6-2  Linearity ≤±0.3% BSFL  Materials Wetted Parts Stainless steel  Media temperature -2085°C  Output 4-20 mA  Overpressure protection 15 bar	Approvals	CE, IEC
Linearity ≤±0.3% BSFL   Materials Wetted Parts Stainless steel   Media temperature -2085°C   Output 4-20 mA   Overpressure protection 15 bar	Electrical connection	DIN A 43650
Materials Wetted Parts       Stainless steel         Media temperature       -2085°C         Output       4-20 mA         Overpressure protection       15 bar	EMC	EN61000-6-4, EN61000-6-2
Media temperature -2085°C  Output 4-20 mA  Overpressure protection 15 bar	Linearity	≤±0.3% BSFL
Output 4-20 mA Overpressure protection 15 bar	Materials Wetted Parts	Stainless steel
Overpressure protection 15 bar	Media temperature	-2085°C
	Output	4-20 mA
Proceura Pango May 10	Overpressure protection	15 bar
riessule Ralige Max	Pressure Range Max	10

Pressure Range Min	0
Pressure reference	Gauge
Process connection	DIN 11851
Sensor technology	Ceramic thick film or Isolated Piezoresistive Silicon
Storage temperature	540°C
Supply voltage	13-36 V DC
