

ECOR STAINLESS STEEL ENCLOSURES

EC020315X

Stainless Box 200x300x150 Grade 304L

- High-grade stainless steel construction for superior corrosion resistance
- IP66/IP69K rated — withstands high-pressure washdowns and total dust ingress
- Ideal for food & beverage, pharma, marine, and chemical environments
- Hygienic design meets strict industry cleanliness standards
- Wide size range with flexible mounting and configuration options

PRODUCT DESCRIPTION

ETA Ecor stainless steel enclosures are designed for demanding industrial environments where corrosion resistance, hygiene, and durability are non-negotiable. Built to withstand harsh conditions — including washdowns, chemical exposure, and extreme temperatures — these enclosures are a trusted choice across food and beverage, pharmaceutical, marine, and outdoor industrial applications.

Available in a range of sizes and configurations, the Ecor range offers robust protection ratings (IP66/IP69K) and is manufactured from high-grade stainless steel, making them suitable for both indoor and outdoor installations where standard steel or plastic enclosures fall short.
