

LARGE NYLON CABLE GLANDS C/W LOCKNUT IP68

DCGM20LGRY (W)
Cable Gland Nylon 20mm Grey Large 10-14m

- Material: Polyamide 6 (PA6), UL 94 V-2 flame-retardant
- Seal Material: NBR (Nitrile Rubber) for secure sealing
- Thread Type: PG (DIN 40430 standard)
- Ingress Protection: IP68 (up to 5 bar, 30 min) / IP69K optional for high-pressure washdown
- Operating Temperature: Continuous: -40°C to +100°C
Short-term: up to +120°C

Product description

These **Bimed** large **nylon cable glands** with locknut are designed for secure and reliable cable entry in electrical enclosures, junction boxes, and control panels. Manufactured from **high-quality polyamide (PA6)**, they provide excellent mechanical strength, resistance to chemicals, UV, and impact, while maintaining an **IP68 protection rating**.

Each gland comes complete with a locknut for quick installation and strain relief, ensuring cables remain protected against dust, dirt, and water ingress, even in demanding environments.
