

PUSH AND TIGHTEN GLANDS IP68

DCGPATM20GRY

Cable Gland Push & Tighten L.Grey O 20

- Ingress Protection: IP68 – dust-tight and waterproof, resistant to immersion
- Quick Installation: Push & lock system allows rapid assembly without tools.
- Material: Polyamide 6 (PA6), halogen-free, UL94 V-0 self-extinguishing.
- Temperature Range: –40°C to +100°C continuous, short-term up to +120°C.
- Strain Relief: Secure clamping prevents pull-out and cable stress.

PRODUCT DESCRIPTION

Bimed Push & Tighten Glands (IP68) are designed for fast, tool-free installation while ensuring maximum cable protection. Their unique push-and-lock system eliminates the need for tightening with spanners, reducing installation time without compromising reliability. Built from high-grade polyamide, these glands provide superior sealing, strain relief, and mechanical stability, making them ideal for control panels, junction boxes, and industrial enclosures.
