CW BRASS CABLE GLANDS C/W LSF SHROUDS

LSFDBW20 Bw Brass Cbl Gld 20Mm 2 Pt Ktt & LSF SH

- Suitable for indoor termination of SWA cables, ensuring reliable clamping and earth continuity.
- Provides IP54 protection as standard; when fitted with shrouds, enhances cable sealing.
- Supplied with LSF (Low Smoke & Fume) shrouds for compliance in safety-critical installations.
- Covers multiple SWA cable sizes with standard metric threads.

Product description

The CW Brass Cable Gland with Low Smoke & Fume (LSF) shroud is designed for terminating and securing SWA (Steel Wire Armoured) indoor cables. Manufactured from high-quality brass, it provides a safe and durable connection while maintaining mechanical and electrical continuity. The addition of LSF shrouds reduces the emission of smoke and corrosive gases in case of fire, making them ideal for environments where safety is paramount, such as public buildings, data centres, and transport hubs.
