

BLANKING PLUG

EPN450/M16

Blanking Plug (191675)

- Protective seal – Blocks dust, moisture, and environmental contaminants
- Durable build – Long-lasting performance in industrial and commercial use
- Easy installation – Quick to fit with standard tools

Product description

Interflex blanking plugs are designed to safely seal unused entries in electrical enclosures, junction boxes, and control panels. By providing a secure closure, they protect equipment from dust, dirt, and moisture while maintaining the integrity of the enclosure.

Made from high-quality materials, Interflex blanking plugs are durable, easy to install, and deliver a clean, professional finish. They are trusted by electricians and contractors for safe and reliable electrical installations.
