

COMPACT INS ISOLATORS AND CHANGEOVER SWITCHES

31114

INS630 630A fixed handle 3P Isolator

- Safe circuit isolation – Guarantees protection during maintenance and emergencies
- Compact design – Saves space without compromising performance
- Changeover functionality – Reliable switching between two power supplies

PRODUCT DESCRIPTION

Schneider Compact INS Isolators & Changeover Switches

The **Schneider Compact INS range** offers reliable isolators and changeover switches designed for safe disconnection and transfer between power sources. Compact in size but powerful in performance, these devices are ideal for panels and installations where space is limited but safety and reliability are critical.

Engineered for durability and ease of installation, the INS isolators and changeover switches ensure compliance with international standards, making them the trusted choice for contractors, panel builders, and OEMs.
