

COMB BUSBAR AND ACCESSORIES FOR GV RANGE

GV2AF3

Manual Starter Combination Block GV2-LC1

- Simplified wiring – Faster and easier connections compared to traditional cabling
- Space-saving design – Neat and compact installation in control panels
- To supply busbar sets GV2G
- Reliable performance – Ensures consistent power distribution across breakers
- Full compatibility – Designed to work with Schneider GV2 and GV3 ranges

PRODUCT DESCRIPTION

Schneider comb busbars and accessories for the GV range are designed to simplify the wiring and distribution of power across multiple GV motor protection breakers. By replacing traditional wiring methods, comb busbars ensure a cleaner, faster, and more reliable installation while reducing panel space and wiring time.

These accessories are engineered for full compatibility with GV2 and GV3 circuit breakers, giving electricians and contractors a professional solution for safe and efficient power distribution.
