

AUXILIARY CONTACTS FOR GV RANGE

GVAE11

Manual Starter Auxiliary 1 N/O 1 N/C (Fr

- Enhanced functionality – Adds signalling and control options to GV breakers
- Easy installation – Simple clip-on mounting without tools
- Compact design – Maintains panel space efficiency

Product description

Auxiliary contacts for the Schneider GV range are designed to expand the functionality of GV2 and GV3 motor protection circuit breakers. They provide additional signalling and control capabilities, making them ideal for applications that require remote indication, interlocking, or integration into automated systems.

Compact and easy to mount, these auxiliary contacts ensure reliable performance while maintaining the robust protection and operation of the GV range.
