

VARIO ISOLATORS

LVS04161

4 Threaded Bars 160A L1000

- Safe and reliable – Guarantees secure disconnection of electrical circuits
- Compact design – Ideal for machinery, control panels, and OEM solutions
- Wide rating range – Available in multiple sizes for varied applications

PRODUCT DESCRIPTION

The **Schneider Vario isolator range** delivers compact, reliable, and safe circuit disconnection for a wide range of electrical applications. Known for their versatility, Vario isolators are designed for use in machine control, industrial panels, and OEM builds where safety and space efficiency are critical.

These rotary isolators provide robust performance, easy installation, and full compliance with international safety standards. With multiple sizes and current ratings available, Vario isolators offer flexible solutions for contractors and panel builders who demand trusted Schneider Electric quality.
