- Provides IP and IK protection for enhanced safety and durability
- Supports custom configurations for operator control solutions

PRODUCT DESCRIPTION

The **Harmony XAPD Metal Control Stations** are built to withstand tough industrial conditions while offering easy installation and long-term reliability. These enclosures are designed to house **Harmony XB4 and XB5 control units**, giving you flexibility to create tailored operator control solutions.

With robust metal construction, the XAPD range ensures durability, resistance to impact, and protection against dust and moisture. Available in various sizes and configurations, these control stations are ideal for machinery, automation systems, and industrial control panels.
