- Compatible with Harmony XB4 accessories and contact blocks

PRODUCT DESCRIPTION

The **Harmony XB4 Metal Range Selector Switches** from Schneider Electric are engineered for durability, reliability, and operator-friendly control. Built with a solid metal body, these selector switches are ideal for demanding environments where ruggedness and performance are essential.

With a wide range of actuator styles, contact block combinations, and operator positions, the XB4 selector switches allow tailored solutions for control panels and machinery. Their modular design makes installation and maintenance straightforward, while ensuring long service life and consistent performance.
