

GV2P RANGE, ROTARY HANDLE WITH OVERLOAD

GV2P04

Motor Circuit Breaker 3P 0.40-0.63A

- Rotary handle operation – Provides smooth control and clear ON/OFF indication
- Built-in overload protection – Protects motors from overheating and electrical faults
- Compact design – Saves panel space while ensuring reliable performance

PRODUCT DESCRIPTION

The Schneider GV2P range of motor protection circuit breakers combines robust overload protection with a rotary handle control. Designed for easy operation and clear visual indication, these breakers provide reliable motor starting and safeguard equipment against short circuits, phase loss, and overcurrent conditions.

With their compact design and durable build, GV2P breakers are a trusted choice for electricians and contractors who need dependable motor protection in industrial and commercial applications.
