MCCB 160A FRAMES AND TRIP UNITS

C16F3 NSX160F 3P 36kA Frame

- Reliable protection Prevents damage from overloads and short circuit
- Adjustable trip units Fine-tune settings for specific system requirements
- Compact & efficient Space-saving design for modern panel builds
- Durable performance Built to withstand demanding environments

Product description

The **Schneider MCCB 160A range** delivers dependable circuit protection and flexibility for industrial, commercial, and panel-building applications. Designed to guard against overloads and short circuits, these Moulded Case Circuit Breakers combine robust 160A frames with advanced trip units for precise, adjustable protection.

Engineered for performance and reliability, the 160A MCCB range ensures safe power distribution while allowing easy maintenance and configuration. Schneider's modular design makes it simple to select, install, or upgrade components as system demands evolve.
