

MCCB 250A FRAMES AND TRIP UNITS

C25F3

NSX250F 3P 36kA Frame

- Accurate protection – Safeguards circuits up to 250A from overloads & short circuits
- Configurable trip units – Adjustable thermal and magnetic settings
- Compact, efficient design – Ideal for control panels and switchboards

Product description

The **Schneider MCCB 250A range** provides dependable circuit protection and flexibility for demanding low-voltage electrical systems. Designed for use in industrial, commercial, and panel-building applications, these moulded case circuit breakers combine strong 250A frames with configurable trip units to deliver accurate, adjustable protection.

Built to handle high fault levels and continuous operation, Schneider 250A MCCBs ensure safe, reliable performance while optimising panel space. The modular trip unit design allows easy maintenance, upgrades, and integration into modern distribution systems.
