

ACTI 9 RCBO 3 PHASE C CURVE

A9DC3710

A9 iCV40N 3P+N 10A C 30mA A-Type RCBO

- 3-phase safety protection
- Handles inrush currents
- Reliable fault detection

Product description

The **Schneider Electric Acti 9 RCBO 3 Phase C Curve** provides combined residual current and overcurrent protection for three-phase electrical installations. Designed for commercial and industrial environments, it offers reliable fault detection against overloads, short circuits, and earth leakages. The C Curve tripping characteristic makes it ideal for circuits with moderate to high inrush currents, such as motors, pumps, and heavy-duty equipment.
