

ACTI9 IC60H PON RCBOS

A9D05806

Acti9iC60H PoN 6A C 30mA RCBO 1 mod

- Overcurrent + earth leakage
- 10kA for demanding applications
- Faster, cleaner installation
- Compliant with IEC/EN 61009-1 standards
- Clear ON/OFF status indicator

Product description

The Schneider Electric Acti9 IC60H PoN RCBO range delivers reliable combined protection against overcurrents (overload and short circuit) and residual currents (earth leakage). Designed for professional electrical installations, these devices offer a high breaking capacity of 10kA, making them ideal for commercial, industrial, and demanding residential environments.

With Plug-on Neutral (PoN) technology, these RCBOs offer a faster, cleaner installation by eliminating the need for separate neutral wiring, reducing time on site and improving overall safety.
