

ISOBAR P - B TYPE THREE PHASE DISTRIBUTION BOARDS

SEA9BPN6

Isobar P 6 way TP&N Distribution Board

- Energy monitoring solutions available
- Flexible circuit configuration
- Efficient distribution for balanced loads
- Manufactured to IEC 61439 and BS EN standards
- Pre-drilled fixing points and cable entry knockouts

Product description

The Isobar P-B Type three-phase distribution boards are designed for safe, efficient, and flexible power distribution in commercial and industrial environments. Built with robust construction and precision engineering, they ensure reliable performance under demanding electrical loads.

These boards provide multiple outgoing ways for circuit protection devices, making them ideal for lighting, power, and mixed-use circuits. The modular design allows easy installation, expansion, and maintenance.
