

GV2L RANGE, ROTARY HANDLE FIXED CURRENT

GV2L04

Motor Circuit Breaker 3P 0.63A

- Rotary handle operation – Smooth control with clear ON/OFF indication
- Fixed current setting – Simple and reliable motor protection without adjustments
- Compact and durable – Saves panel space while offering long service life

PRODUCT DESCRIPTION

The Schneider GV2L range of motor protection circuit breakers features a **rotary handle with fixed current settings**, offering a simple and reliable solution for motor control. Designed for straightforward operation, the GV2L range provides dependable protection against short circuits while ensuring ease of use in compact installations.

With its durable design and Schneider's trusted engineering, the GV2L range is ideal for applications where fixed current protection is sufficient, such as pumps, fans, and small machinery
