

GV3P RANGE, ROTARY HANDLE WITH OVERLOAD

GV3P18

Motor Circuit Breaker 3P 12-18A

- Rotary handle control – Smooth operation with clear ON/OFF indication
- Integrated overload protection – Prevents damage from overheating and overcurrent
- Higher power capability – Suitable for larger motors and demanding application
- Durable design – Reliable performance in industrial environments

PRODUCT DESCRIPTION

The Schneider GV3P range of motor protection circuit breakers combines a **rotary handle control** with **built-in overload protection** for reliable motor starting and safeguarding. Designed for higher power ratings than the GV2 range, GV3P breakers protect motors against overcurrent, short circuits, and phase loss while offering smooth and intuitive rotary operation.

Compact, robust, and easy to install, the GV3P range is widely used in industrial and commercial applications where dependable motor protection and clear visual control are essential.
