

MCCB 100A FRAMES AND TRIP UNITS

C103TM080

NSX100 3P Thermal Magnetic 80A Trip Unit

- Reliable protection – Safeguards circuits up to 100A against overloads & faults
- Customisable trip units – Adjustable settings for accurate protection
- Compact design – Saves panel space without reducing performance
- Durable build – Long-lasting operation in demanding environments

Product description

Schneider **Moulded Case Circuit Breaker (MCCB) frames and trip units – 100A range** – deliver reliable protection for low-voltage circuits against overloads and short circuits. These breakers combine robust frames with adjustable trip units, allowing precise protection settings tailored to your application.

Ideal for industrial, commercial, and panel-building projects, the 100A MCCB range is compact, easy to install, and fully compliant with international safety standards. Schneider's modular design makes it simple to upgrade or replace trip units, ensuring long service life and flexibility.
