

## MCCB 630A FRAMES AND TRIP UNITS

C63N3

NSX630N 630A 3P 50kA Frame

- Heavy-duty performance – Handles currents up to 630A with precision protection
- Configurable trip units – Adjustable overload and short-circuit settings
- Compact and robust – Ideal for high-power industrial environments
- Easy installation – Modular frame and accessible configuration options

### PRODUCT DESCRIPTION

The **Schneider MCCB 630A range** is built for demanding power distribution systems that require maximum protection, reliability, and control. With rugged 630A frames and advanced trip units, these moulded case circuit breakers ensure safe and efficient operation across large industrial and commercial installations.

Designed to handle high fault levels, the Schneider 630A MCCB series provides adjustable thermal and magnetic settings for precise coordination and system flexibility. Its compact and modular construction allows easy integration into switchboards, MCC panels, and power distribution setups.
