

HARMONY XPS SAFETY MODULES

XPSBAC14AP

Safety Module, 24V AC/DC, Basic CAT4

- Certified safety compliance – Meets international safety standards (EN/ISO, IEC)
- Versatile functionality – Supports emergency stop, gate monitoring, and more
- Simplified wiring – Reduces installation time and potential errors
- Reliable diagnostics – LED indicators for clear fault and status reporting

PRODUCT DESCRIPTION

The **Harmony XPS Safety Modules** by Schneider Electric are designed to ensure reliable safety control in industrial automation and machinery environments. These modules monitor safety functions such as emergency stops, safety gates, and two-hand controls, providing dependable protection for personnel and equipment.

Built to integrate seamlessly into automation systems, Harmony XPS modules offer quick diagnostics, modular design, and easy installation — making them ideal for OEMs, panel builders, and system integrators who prioritise both safety and efficiency.
