

ANALOGUE AMMETERS DC

PQ44-I39L2N1CAW0ST
Ammeter DC 48x48 0-30A

- DC specific — accurate current indication for battery, drive, and renewable energy applications
- Direct connect and shunt input options — 60mV shunt input available for 60A measurement
- 48x48mm and 72x72mm formats — fits standard panel cutouts
- 20A, 25A, 30A, and 60A scales — covers most common DC panel current ranges Simple installation — no auxiliary power supply required

PRODUCT DESCRIPTION

Sifam Tinsley DC analogue ammeters are available in 48x48mm and 72x72mm panel formats, covering current ranges from 20A to 60A. The range includes standard direct-connect models and a shunt-input variant for 60A measurement via an external 60mV shunt — making them suitable for battery systems, DC drives, renewable energy installations, and industrial DC control panels where accurate current indication is required.
