Product description

Fibox MNX Enclosures – Durable Industrial & Outdoor Protection

The Fibox MNX series offers robust polycarbonate and ABS enclosures designed to protect sensitive electrical and electronic components in harsh industrial and outdoor environments. With high IP66/IP67 ratings, these enclosures provide superior protection against dust, water, and impact, ensuring reliable performance in demanding applications. Available in multiple sizes and configurations, MNX enclosures feature both transparent and opaque cover options, making installation and inspection easy. Certified to UL standards and engineered for durability, Fibox MNX enclosures are the ideal choice for industrial automation, control panels, and outdoor electrical housings.
