EKHA 130G enclosure Enclosure, PC Grey cover

- Flexible modular system – EK enclosures can be interconnected to create large, multi-compartment cabinets.
- Multiple flange openings – Allows integration of accessories, cable glands, or connections between enclosures.
- Wide hinge access (FSH models) – Enables easy front access with full-width opening for maintenance and installation.
- Durable polycarbonate construction (PC) – Ensures long life, corrosion resistance, and superior impact strength

Product description

The **Fibox EK range** is the ideal solution for housing electrical and electronic equipment — whether in a single standalone enclosure or a fully modular system. Designed for demanding industrial and outdoor environments, EK enclosures provide exceptional protection, durability, and adaptability.

Each enclosure can be configured individually or connected to others to create larger cabinet assemblies, offering maximum flexibility for panel builders, OEMs, and control system designers.
