

# DEHNRAPID TYPE 1 SURGE ARRESTERS FOR TELECOMMUNICATIONS

906101

DPGLSA60P DEHN enclosure for 6 LSA Block

- Type 1 surge protection for telecom lines Designed to handle direct lightning currents on communication systems.
- High lightning current discharge capacity Suitable for exposed installations and outdoor line entry points. Protection of critical communication infrastructure
- Fast response characteristics Effective protection for sensitive data and signal circuits.
- Energy-coordinated protection Works alongside downstream Type 2 and Type 3 telecom arresters.

## Product description

The **DEHNrapid range** provides **Type 1 surge protection for telecommunications and data lines**, designed to safely discharge **direct lightning currents** and protect critical communication infrastructure.

Installed at the line entry point, DEHNrapid surge arresters form the first level of protection for telecom systems exposed to lightning and high-energy surges. They are widely used across **telecommunications, industrial networks, and critical infrastructure installations in Ireland**, where service continuity and equipment protection are essential.
