

DEHNshield TYPE 1,2 AND 3 COMBINED LIGHTNING CURRENT AND SURGE ARRESTERS

PROJ941405

DSHTNS255FM DEHNshield Type 1&2, 4 pole

- All-in-one Type 1, 2 & 3 protection
- High lightning current discharge capability Suitable for installations exposed to direct lightning currents.
- Maximum system availability Advanced follow current limitation minimises nuisance tripping and downtime.
- Energy coordination built in Designed to work seamlessly with other DEHN surge protection devices.

Product description

The **DEHNshield range** provides combined **Type 1, Type 2 and Type 3 lightning current and surge protection** for **low-voltage electrical systems** exposed to lightning strikes and transient overvoltages.

Designed for installation at the service entrance and within LV distribution boards, DEHNshield arresters deliver **coordinated protection from incoming supply right through to terminal equipment**. This makes them a reliable choice for **commercial, industrial and critical infrastructure projects across Ireland**, where system availability and equipment protection are essential.
