

SOLID PC TRANSPARENT LIDS

PC1919T30

Lid (Transparent) - 190 * 190 * 30 (EKH)

- Durable polycarbonate design – High impact resistance for long-lasting use
- Transparent finish – Allows clear visibility of components without opening
- Reliable protection – Shields enclosures from dust and dirt

Product description

The **Fibox Solid Polycarbonate (PC) Transparent Lid** is designed to provide durable protection while allowing clear visibility of enclosed components. Manufactured from **impact-resistant polycarbonate**, these lids combine strength with functionality, making them ideal for industrial and commercial enclosures.

Perfect for applications where monitoring or inspection is required without opening the enclosure, transparent lids save time while maintaining protection against dust, dirt, and environmental factors. Easy to install and built for long service life, they are a practical choice for electricians and panel builders.
