

MCE65 RANGE

7350000

MCE65 4M

- Modular design – Available in various sizes (4 M, 6 M, 12 M, 24 M, 36 M, 48 M) for scalable installations.
- Durable thermoplastic construction – Materials such as polycarbonate and ABS offer weather resistance, UV-stability, and a professional finish
- IP65 and IK08 ratings – Protects against dust, spray water, and mechanical impact, making it suitable for demanding environments
- Clear or grey covers available – Choose transparent lids for visual inspection or solid covers for a clean aesthetic.

Product description

Fibox MCE65 Modular Component Enclosures

The Fibox MCE65 range is a modular, high-quality enclosure series designed for control panels, distribution boards, and general purpose electrical installations. Constructed from robust thermoplastic (polycarbonate, ABS or polyester) with an IP65 rating, these enclosures deliver long-lasting protection indoors and outdoors.
