- Strong, durable construction
- Dimensions from 320*220*150 mm to 420*320*150 mm.

Product description

Fibox enclosures are built for situations where durability and protection aren't optional. Their polycarbonate and GRP construction gives you strong impact resistance, UV stability and long-term performance outdoors or in harsh industrial settings.

Here's the thing — Fibox doesn't just make boxes. They make enclosures that stay rigid, protect sensitive components and handle real-world abuse from weather, moisture, chemicals and vibration. Installers like them because they're easy to work with, lightweight and available in a wide range of sizes and configurations.
