

LYTE SERIES POWER SUPPLIES - SINGLE PHASE

DRL24V120W1EN

Power Supply 24V DC 120W, 5A

- Cost-effective without compromising reliability A great balance of performance and value for everyday industrial and automation applications.
- Stable 24V DC output Keeps control circuits and automation hardware running smoothly.
- Compact DIN-rail design Saves space in tight control panels and makes installation straightforward.
- Full overload and short-circuit protection Protects downstream equipment and minimises downtime.

PRODUCT DESCRIPTION

Lyte Series single-phase power supplies are built for installers who want solid, budget-friendly performance without cutting corners on reliability. They deliver stable 24V DC output for PLCs, sensors, relays, conveyors and general automation equipment — exactly the kind of everyday industrial applications where consistency matters.
