BUTT SPLICE CONNECTORS

MNF10
Butt Splice 10sq Copper

- Tin plated
- Corrosion resistant
- Suitable for temperatures up to 150°C

PRODUCT DESCRIPTION

Klauke butt splice connectors are designed for fast, secure joining of copper conductors. Whether you're working with solid, stranded, or fine-stranded cables, these connectors deliver reliable electrical performance and easy installation.

Key Features:

- Made from high-conductivity copper
- Tin-plated for excellent corrosion resistance
- Suitable for solid, stranded, and fine-stranded conductors
- Compatible with standard crimping tools
- Available in standard, insulated, and solid-conductor variants
- Sizes from 0.75 mm² to 400 mm²

Applications:

- Electrical wiring and maintenance
- Panel building
- Industrial control systems
- Power distribution and automation
