

HOLE PUNCH TOOLS

LS50FLEXCFM

Battery Punch Tool c/w 18v Makita Batt

- Precise hole cutting – Clean, accurate, and burr-free results
- Durable construction – Long-lasting tools for repeated use
- Time-saving design – Faster than conventional drilling method
- Versatile use – Works on steel, stainless steel, and electrical enclosures

Product description

Greenlee hole punch tools are trusted by electricians and contractors worldwide for creating clean, precise holes in electrical panels, switchgear, and enclosures. Built from high-quality materials, these tools deliver long-lasting performance and reduce installation time compared to drilling.

Engineered for ease of use, Greenlee punches provide sharp, burr-free cuts that ensure a professional finish. Suitable for mild steel, stainless steel, and other materials, they are an essential tool for panel building, electrical installations, and maintenance work.
