RK SAFE BOX TS35/100

17690.4
RK-Safe-Box TS 35/100 BK

- Securable cover to prevent access
- Designed for use on CT Link assemblies
- Compatable with PTK disconnect range

PRODUCT DESCRIPTION

Using their innovative terminal block housing, RK Safe-Box, Contaclip offer you a quick and easy protection for terminal blocks, electronic transformers etc., which are installed on mounting rails. The Safe-Box effectively prevents the unauthorised operation of converter terminals or the changing of the wiring particularly in the pre-meter area of power distribution systems. The side panels are directly on the mounting plate and totally enclose the components or assemblies which are to be protected. The wire-feed through the walls of the box simplifies the wiring and makes the subsequent manipulation of the clamp connections with a closed box impossible. Without the transparent lid, the internal dimensions of the box can be extended by 16 mm using the built-in sliding mechanism. This makes maintenance work or the exchange of terminals or components much easier.

Features:

- Quick and easy to install on TS 35 DIN mounting rails
- Highest mechanical attachment to the mounting rail
- When fitted, it cannot be unlocked from the mounting rail, nor can it be pulled off
- Three seal fitting locations are available
- Transparent lid
- Any alterations are immediately detectable
- The sliding mechanism of the two housing halves means that the installed components are more easily accessible during maintenance.

SPECIFICATIONS

Color	Black

Length	91
Width	101.3
Height TS 35/7.5	68.5
Height TS 15/5.5	76
IP Class	IP20

Flamklass	UL94-V0
Operating temperature from	-40
Operating temperature to	120

Tariff code	85369010
Country of origin	DE
Weight	77
Pack Size	1
