ANDERSON NEGELE - ADAPTERS AND ACCESSORIES

CLEANadapt

CLEANADAPT

- Flexible process connections for pipes and containers. Suitable for hygienic sensors with M12, G1 / 2 "and G1" thread
- Hygienic, elastomer-free process connection for use in breweries, dairy, food and pharmaceutical industry, biotechnology and peripheral applications (water and wastewater treatment, etc.)
- Perfect hygiene adjustment is achieved without the use of any additional elastomeric sealant material
- Installation according to the EHEDG report
- 3-A compatible process connection only for PEEK sealant sensors

PRODUCT DESCRIPTION

We market high quality process connections and design from our supplier Anderson-Negele, which meets the highest standards of process engineering, and is the perfect solution for applications for food, pharmaceuticals, breweries, cosmetics and pharmaceptic processes.

The products from Anderson-Negele are manufactured according to the concept "Hygienic by Design", which is reflected in the special process adapters CLEANadapt.

CLEANadapt for all types of sensors
· Defined position for cable wiring at the welding sleeve label eg M12
· Only 3 thread sizes for all sensors: M12, G½ ", G1".
· Module-based customization concept for all process connections: Tri-Clamp, Dairy Flange, DRD, VARIVENT, BioControl
· 3A approved with connectors metal to PEEK
· EHEDG approved with metal-to-metal connection material
