

KUEBLER - INCREMENTAL PULSE TRANSDUCER, STAINLESS STEEL, SENDIX 5006/5026

SERIE 5006

- Housing diameter Ø58 mm
- stainless steel housing
- Axle seal in Viton® from DuPont ©
- Temperature range -40 to +85 ° C

Product description

Sendix 5006/5026 is a robust incremental shaft sensor specially designed for industrial use outdoors or in the food industry. The shaft seal is in Viton® material from DuPont. Viton® is specially designed to cope with chemical impact. With its powerful housing, the sensor is more protected from impact and impact than previous models in the 58XX series. With the new Safety-Lock™ construction, the bearings in the angle sensor have been placed with a larger line spacing and a special locking latch that prevents stock displacement in any direction.

The sensor comes with shaft and hole shaft, in combination with several different flanges to fit where 58mm sensors have previously been sitting.

Specifications

Connection Thread	M12
-------------------	-----

Housing diameter	58
IP Class	IP66, IP67
Mounting	Shoulder
Output	Push/Pull, RS422
Pulse Max	5000
Sensor type	Incremental
Shaft Diameter max	10
Shaft Diameter min	6
Supply Voltage DC Max	30
Supply Voltage DC Min	5
Temperature range from	-40
Temperature range to	85
Version	Multiturn

1) M3, 5.5 djup

1) 3xM4, 6 djup
