- Good reading performance on 1D linear codes
- USB, RS-232, Keyboard Wedge, IBM 46XX and Wand
- 'Green Spot' technology for good-read feedback

PRODUCT DESCRIPTION

For customers who want the high performance associated with laser scanning technology, the Gryphon GD4300 scanner is an ideal solution providing longer reading distances, snappy performance with a bright, well-defined scan line. Poor quality bar codes and low contrast labels with bad edge definition are not a problem for this Gryphon scanner, plus Datalogic's patented Green Spot provides visual good-read feedback directly on the code, allowing for fast and accurate scanning which is especially useful in noisy environments or in places where 'beep-free' reading is desired. The Gryphon GD4300 readers offer a choice of two sets of multi-interface options: USB, Keyboard Wedge, RS-232 and Wand Emulation, or for use at the point-of-sale (POS), IBM 46XX, USB and RS-232.
