BRANCHING BLOCKS

HPS 120/A
120A HPS Branching Block

- efficient Power Distribution Distributes a single input to multiple outputs, simplifying wiring.
- Compact Design Optimises space within electrical panels and enclosures.
- Secure Electrical Connections Ensures reliable and stable performance.

PRODUCT DESCRIPTION

The **Tekox Branching Blocks** are designed to provide safe and efficient power distribution within electrical panels, enclosures, and industrial installations. These blocks allow a single input to be distributed across multiple outputs, helping to simplify wiring and improve organisation inside control cabinets. Built for reliability and ease of installation, Tekox branching blocks ensure secure electrical connections while reducing installation time for panel builders and electricians. Their compact design helps optimise space, making them ideal for modern control panels where efficient layout and accessibility are essential.

Suitable for a wide range of applications, including **industrial automation, switchboards, and electrical distribution systems**, Tekox branching blocks are a practical solution for structured and safe power distribution.
