

DRAWSTUDS FOR STAINLESS STEEL

50294512

Slug Splitter Hydraulic Draw Stud 19x11.1mm

- Heavy-duty design – Specifically built for punching stainless steel
- Hardened steel construction – Long-lasting durability under high loads
- Reliable performance – Smooth operation with reduced wear on tools
- Full compatibility – Works with Greenlee stainless steel knockout systems

PRODUCT DESCRIPTION

Greenlee drawstuds for stainless steel are engineered to withstand the extra force required when punching through tough materials. Built from **high-strength, hardened steel**, these drawstuds deliver reliable performance and long service life in demanding applications.

Designed for use with Greenlee stainless steel knockout punches and dies, they ensure smooth operation, reduced wear, and consistent hole quality. Perfect for electricians, contractors, and panel builders working with stainless steel enclosures and switchgear.
