

DRAWSTUDS

51300430

Slug Buster Hydraulic Draw Stud

- Durable construction – Hardened steel for long-lasting use
- Essential knockout part – Provides pulling force for punches and dies
- Multiple sizes available – Compatible with a wide range of Greenlee systems

Product description

Greenlee drawstuds are essential components for knockout punching systems, providing the pulling force needed to drive punches through panels and enclosures. Designed from **hardened, high-strength steel**, they deliver reliable performance and long service life even under heavy use.

Available in multiple sizes to suit different Greenlee punches and dies, drawstuds ensure smooth operation and compatibility across a wide range of knockout tools. Perfect for electricians, contractors, and panel builders who require durable, professional-grade components.
